Journal of Donghua University (Social Sciences)

Background

Since the implementation of the Belt and Road, China has promoted exchanges, integration, and mutual learning among countries along the Silk Road through people-to-people exchanges and cooperation, and promoted cultural exchanges and industrial integration among countries. By learning from each other's civilizations, China is building a new cultural system of a more harmonious, diverse and equal world. Especially in the wake of the COVID-19 pandemic in 2020, it is the call of The Times to engage in dialogue among civilizations to enhance mutual understanding, to find the basis for common values, and to work together to address common challenges all humanity faces.

This conference will actively formed the systemic research of cultural exchanges, for the construction of culture. Human society modernization and globalization depend on the common pursuit of cultural exchanges. In the context of the global pandemic outbreak, mutual learning helps to enhance the spirit of the outbreak strength, promote the understanding of a community with a shared future for mankind, and will help the world better understand peaceful green, healthy development and build a better life in the world.

Symposium Sessions
